

## WOODLAND AND LEARNING RESOURCES PARTNER UP FOR CHILDREN

October 21, 2008

Gurnee, IL - Since 2005 Woodland Primary School has worked collaboratively with Learning Resources of Vernon Hills to create mutually beneficial projects. Over the years, Learning Resources has provided the Primary School with thousands of dollars of educational materials to use in their classroom. Recently, they made a donation of more than \$18,000 worth of educational materials to the school.

"We were overwhelmed with their generosity! Woodland is always looking for ways to be fiscally responsible yet provide the best education for our children using the most current creative tools. Our teachers can't wait to try new products from Learning Resources because they know our students are so motivated by them. This is a perfect example of how businesses and schools can work together," said Lori Casey, Primary School Principal.

The Woodland Primary School has seven hundred and fifty students in Early Childhood and Kindergarten. Through the years, the partnership has blossomed. Representatives from Learning Resources have spent time in classrooms at Primary and watched children use their products. They have given teachers new products to use and then teachers have filled out product feedback forms to impact educational product development for the company.

"At Learning Resources, we recognize the importance of giving back to our local community and are proud to support the educational efforts of Woodland Primary School," said Eric Toriumi, senior marketing director of Learning Resources. "Both organizations recognize the importance of hands-on learning and are committed to seeing children succeed in school."

### About Learning Resources
